

**The U-Design Technology**  
SWISSBAU – Basilea 16<sup>th</sup> – 20<sup>th</sup> January 2018  
Hall 2.1 Stand E14

**U Design is a revolutionary line of Stone Italiana**, overcoming the limitations of flat surfaces and bringing quartz into the third dimension.

U Design kitchen sinks allow a continuous flow between the kitchen worktop and the sink itself: the same material, the same colour and the same outstanding features for which Stone Italiana quartz surfaces are renowned and widely used in kitchen manufacture all over the world.

Every U Design product – for kitchens and also for bathroom - can be chosen into a **big palette of bright or sober colors, in matt or gloss finish, with customizable sizes**, so not to be aesthetically unconnected with the floor or the countertop.
