

The Craken Collection
 SWISSBAU – Basilea 16th – 20th January 2018
 Hall 2.1 Stand E14

Stone Italiana will be presenting at SWISSBAU the complete colours range of Craken Craquelé collection, first previewed at Salone del Mobile 2017 as a hot new experiment. The exhibition will take place in Basilea from 16th to 20th January.

The *black version* with white veins creates a total contrast, as does its negative, *white with black* veins; separately or together, these contrast pieces make a remarkable visual impact.

The *Taupe*, *Basic* and *Noisette* surfaces, with contrasting but refined coloured veins, are softer, more elegant and more cocooning.

Stone Italiana's real innovation lies in retaking the concept of craquelé - usually a synonym for aging, used to date and reconstruct the history of varnished paintings - reinterpreting it in contemporary mode. The network of cracks is skilfully created by expert hands: first they break up the slabs, then begin the process of recomposing and fixing the pieces together. The result is surfaces that are perfect for projects of floorings and wall claddings, for luxury interiors and also for kitchen countertops with real character.

The Craken Craquelé colour range:

- Noisette-Bordeaux
- Basic_White
- White_Gray
- White_Black
- Taupe_Dark
- Black_Brown
- Black_White
